

EXPANDING A MAJOR COPPER TREND.

Strategic | Disciplined | Responsible | Committed

Corporate Presentation | November 2025

TSX: **COPR** OTCQB: **CPPMF** FSE: **9I3**

Cautionary Notes

This document has been prepared by Coppernico Metals Inc. (“Coppernico” or the “Company”) to showcase the Company’s mineral exploration projects. Because it is a high-level summary presentation, the information contained herein cannot contain all the information that should be reviewed before making an investment decision.

SUMMARY OF CAUTIONARY NOTES:

- Forward-looking statements are inherently uncertain;
- Canadian mineral disclosure differs from US mineral disclosure;
- See full disclosure records for Coppernico at www.sedarplus.ca – some information may be found under the Company’s former name, Sombrero Resources Inc., or the predecessor company, Auryn Resources Inc. (now Fury Gold Mines Limited).

The scientific and technical information contained in this presentation was reviewed and approved by Tim Kingsley, M.Sc., CPG, Coppernico’s VP of Exploration, who is a “Qualified Person” (as defined in NI 43-101).

Track Record of Monetizing Exploration Success

KEEGAN RESOURCES

2008 – 2010 (now Galiano Gold)

PRODUCING

Discovery of over **5 Moz** with favorable market conditions

CAYDEN RESOURCES

May 2013 – September 2014

TAKEOVER

100 discovery holes led to Agnico Eagle Mines takeover in 2014 (**sold for C\$205M**) with challenging market conditions

A discovery-focused management team

Creating & Monetizing a Tier-One Exploration Portfolio

- Our flagship asset Sombrero offers the opportunity to **extend a world-class copper-gold skarn and porphyry mining trend** through new discoveries.
- We believe Sombrero is a **direct analogue to Las Bambas, the 11th largest Copper producing mine** in the world and other major nearby mines
- Prioritizing safety, local communities and the environment at all times.

Recent Key Milestones and Near-Term Catalysts

2024

- ✓ Secured **C\$19 million in financing**, including a 9.9% *strategic investment by Teck*
- ✓ Successfully **listed Coppernico on the TSX** under symbol “COPR”
- ✓ **Launched inaugural drill program** at Sombrero

2025

- ✓ **Confirmed a significant skarn system** at Sombrero
- ✓ **Expanded the target pipeline** across multiple priority areas
- ✓ **Optimized its large land position** with numerous scalable exploration targets

Next Steps

- **Expansion of drill permits** to increase drill holes, drills, and permitted area (underway)
- **Advancement of project pipeline** including Sombrero drill targeting, and generative reviews (underway)
- **Strengthening community partnerships** through additional agreements
- **Evaluating high-quality assets** in complementary jurisdictions

Seasoned Management with Global Discovery Expertise

MANAGEMENT

Ivan Bebek
Co-Founder, Chair & CEO

- **>25 years' experience** in financing exploration, foreign negotiations and M&A
- Formerly President, CEO & Co-founder at Cayden Resources (sold to Agnico Eagle for C\$205M) Former Exec Chair of Auryn Resources & Co-founder Keegan Resources

Christian Rios M.Sc., P.Geo.
SVP, Corporate Development

- **>24 years' experience** in exploration, development, operations and communities
- Directly involved in the discovery of the Santa Ana and Corani deposits at Bear Creek

Stacy Rowa CPA, CA
CFO

- **>19 years' experience** in accounting, auditing and corporate finance
- Was CFO at Auryn Resources (predecessor company)

Tim Kingsley MSc, CP.Geo
VP, Exploration

- **>20 years' experience** in precious and base metal exploration and project development
- Track record in brownfield exploration and increasing mineral resources at Trevali Mining

DIRECTORS*

Ivan Bebek Co-Founder, Chair & CEO >25 years
Financing Exploration, Foreign Negotiations and M&A

Antonio Arribas PhD >38 years
Mineral Exploration Experience Across Multiple
Companies and Regions

MJ McQuhae MBA >26 years
Business Transformations, Operational Improvements

Marie-Hélène Turgeon M.Env., ICD.D, P.Geo >23 years
ESG, Environmental Management, Legal Compliance
and Stakeholder Engagement

Jeffrey Mason CPA, CA, ICD.D >36 years
Extensive experience in Corporate Finance in precious and base
metals projects in the Americas, Asia and Africa

Gordon J. Fretwell LLB >33 years
Corporate And Securities Law

*All directors are independent aside from Ivan Bebek who is non-independent

Length and density weighted assay composites. True thickness is unknown, the highlighted channels are oriented generally perpendicular to rock outcrop and are considered most representative at time of reporting. Reported composites are for the entire length of each channel, no sample/interval was excluded from the composite calculation. No more than 6 m internal dilution (reported values below 0.2% Cu). Minimum reporting length of 6 m.

Niococ Channel Samples

Nioc | Channel Sampling open for expansion

Nioc Target Area | Recent Channel Samples

Nioc Cross-Section

Nioc Plan View

- Large, vertically continuous +20mV/v chargeability anomalies
- Significant copper mineralization present on surface

Expanding on Key Targets

The principal targets at Sombrero are copper-gold skarn, porphyry systems and precious metal epithermal systems.

Building on insights from Phase 1 drilling, **Antapampa** and **Tipicancha** have been identified as new targets for further exploration.

Milpoc and **Macha Machay** have recently been incorporated into the regional exploration pipeline based on encouraging surface geochemical and alteration signatures.

Rumi was recently staked to expand the project footprint to the southeast.

Historical Drill Core Supports Robust Model

Subsurface Mineralization Correlates with Geophysics

At 33 m: 1.32% Cu and 0.03 g/t Au in hematite vein stockworks with malachite staining at their margins

At 62 m: 1.35% Cu and 0.54 g/t Au massive magnetite with disseminated pyrite in sulphide zone

Shallow historical drilling¹ along a portion of the geophysical anomalies demonstrates **high-grade mineralization from surface** that continues to depth and provides direct validation of the 10 km geophysical signature:

Hole ID	Interval ² (m)	% Cu	g/t Au
FE-DDH-01A	90.4	0.48	0.05
Including	41.8	0.88	0.02
FE-DDH-02	51	0.43	0.16
Including	20.95	0.70	0.25
FE-DDH-03A	116	0.42	0.24
Including	64	0.64	0.38
FE-DDH-03B	50.8	0.44	0.15
True thickness of mineralization is unknown			

- 2013 drilling completed by Aceros only assayed for iron, resampled by Auryn in 2019 (See Auryn news release dated June 13, 2019)
- No less than 5m of $\geq 0.1\%$ Cu, maximum dilution 6 m (See technical disclosure in Auryn news release dated June 13, 2019)

Brownfield Discovery Expansion Potential

Tipicancha | Epithermal System with Porphyry Potential

- New large epithermal-porphyry system younger than the Eocene skarn-porphyry targets, demonstrating multiple mineralizing events.
- Horizontal and vertical zonation demonstrated by geologic mapping, alteration and geochemistry indicate temperature increasing with depth.

Antapampa | New Skarn Target

New area with many characteristics similar to Nioc and Fierrazo.

- Iron: magnetite and hematite mineralization.
- Garnet skarn associated with monzonite intrusion.
- Possible northward extension of Nioc, or new intrusive center.
- Highlights early stage of exploration with significant potential to discover new targets as Coppertino continues to advance investigations.

- A) Initial reconnaissance mapping at Antapampa target.
- B) Massive magnetite mineralization.
- C) Red garnet skarn alteration.
- D) Altered monzonite intrusion.

400-m Vertical Window of Potential Mineralization

Good Lucky Target 7km NE of Ccascabamba Target

Expanding Drill Permits

HUANCASANCOS:

- **Environmental permit (DIA)¹ in place** – allows for up to 49 holes from 38 drill pads at Ccascabamba target area
 - Three-year renewable **social access agreement in place**
 - **Start of Activities permit (IDA)² in place** – allows for the initiation of drilling activities.
-
- Working on additional community partnerships in the region

Sombrero Property | Ownership

Sombrero property covers approx. 56,400 hectares¹ which has been acquired through a combination of staking and option agreements

Ownership	Claims	Hectares
Direct*	71	54,500
Aceros Option	3	600
Mollecruz Option	4	1,300

*Sombrero Minerales S.A.C is Coppernico's wholly owned subsidiary in Peru through which the Company directly owns its concessions

1. The total claim area is reported as 53,800 Ha; however, it is noted that there are overlaps within the claims. Following the removal of these overlaps, the effective area is ~49,900 Ha.

Aceros Option | Payments

Due Dates	Property Payments (US\$)	Property Payment Status	Work Expenditures (US\$)	Work Expenditure Status
December 13, 2018	\$140,000	Completed	-	-
December 13, 2019	\$60,000	Completed	\$150,000	Completed
Within 6 months of obtaining access	\$250,000	Completed	\$500,000	Completed
Within 24 months of obtaining access	\$350,000	Completed	\$1,500,000	Deferred
Within 36 months of obtaining access	n/a	n/a	\$3,000,000	Deferred
Total	\$800,000		\$5,150,000	

- If the option is exercised, a joint venture will be formed in which Coppernico will hold an 80% interest and Aceros will hold a 20% interest in these concessions
- In 2021, the Company amended the agreement to defer the work expenditure requirements dependent on access to the concessions, in exchange for an additional annual payment of US\$100,000 for the period that the option is in place

Mollecruz Option | Payments

Due Dates	Property Payments (US\$)	Property Payment Status	Work Expenditures (US\$)	Work Expenditure Status
June 22, 2018	\$50,000	Completed	-	-
Subject to access	\$50,000	Completed	\$150,000	Deferred
Subject to access	\$100,000	Deferred	\$150,000	Deferred
Subject to access	\$200,000	Deferred	\$500,000	Deferred
Subject to access	\$300,000	Deferred	\$700,000	Deferred
Subject to access	\$900,000	Deferred	\$1,500,000	Deferred
Total	\$1,600,000		\$3,000,000	

- The Company may acquire a 100% interest, subject to a 0.5% net smelter royalty fee, through a combination of work expenditures and cash payments
- On May 20, 2019, the Company formally declared the existence of a force majeure event thereby deferring the Company's obligation to make the June 2019 property payments and any subsequent property payments and work expenditures for a maximum of 24 months from the declaration date
- On March 1, 2021, the Company agreed with the owner to extend the force majeure declaration for another 24 months and paid US\$50,000 as consideration for the June 2019 property payment. As a result, the Company was able to continue deferment of the remaining property payments and work expenditures until May 20, 2023
- On May 15, 2023, the Company amended its option agreement and extended the recognition of the force majeure status until such time an agreement or agreements are in place that allow the Company to access the concessions in order to carry out exploration work
- A payment of US\$5,000 was confirmed and paid at the time of amendment and will be paid annually under the option agreement until access to the concessions is achieved by the Company
- In February 2025, an updated Mollecruz Option was signed with no material changes to the terms with the purpose of filing a current dated document with the Peruvian public registry. The Company continues to work with the local community to achieve access in this area.

Cross-section of Holes 4, 13, 14, and 15

Exploring for extension of mineralization from hole 4

Drill Core from Hole 24SOM-004

The drill core exhibits significant skarn alteration over long intervals, as well as zones of strong hematite (iron) replacement of original rock

~70m intercept of Fe skarn (hematite/magnetite) replacement of limestone

"The Ccascabamba Area represents a large, very active mineralized system, and the extent of skarn alteration and the presence of sulphide minerals in hole 4 support our exploration thesis. This, combined with the complexity of the vein systems, indicate that we are in a highly prospective zone."

- Tim Kingsley, VP of Exploration

Drill Core from Hole 24SOM-004

Hole 4 displays zones with high concentrations of sulphide minerals including pyrite, chalcopyrite and pyrrhotite. Several intervals show a complex network of overprinting vein generations more than one of which contains chalcopyrite.

Diorite with secondary biotite alteration overprinted with several vein generations:

1. Garnet veins
2. Magnetite with epidote and chlorite veins, with a second event of pyrite deposited along magnetite borders with an associated sericite alteration halo.
3. Anhydrite + sulphides (pyrite - chalcopyrite - pyrrhotite - sphalerite) veinlets with sericite and chlorite alteration halo.
4. Late calcite and silica veins.

Drill Core from Hole 24SOM-004

- Garnet exoskarn overprinted chlorite +/- pyrite retrograde event.
- Cut by anhydrite + sulphides (pyrite - chalcopyrite - pyrrhotite - sphalerite) veinlets.
- Sulphides also present as disseminations.

These geological characteristics suggest a robust and multiphase mineralized system and further strengthen the potential for significant copper-gold skarn mineralization at this target.

Sombrero Project | Timeline

2001	Aceros Arequipa, Peru's largest steel maker, carried out bulk sample testing at Fierrazo.
2007 – 2008	Alturas Minerals completed localized mapping, sampling and geophysics.
2013	Aceros Arequipa completed 8 holes for 988 m drilling at Fierrazo, targeting iron mineralization.
2015 – 2016	Auryn geologists recognized that the Andahuaylas-Yauri belt continues under volcanic cover at Sombrero; skarn and porphyry mineralization in erosional windows prove the concept.
2016	Auryn acquired Ccascabamba claims and carried out prospecting, claim expansion and stream sediment sampling program.
2018 – 2020	Auryn carried out mapping, geochemistry, geophysics, age dating and target generation. Option of Fierrazo concessions.
2023	Received Social Access Agreement.
2024 – onward	Fully permitted in H1/2024: Received drill permits, financed 18 months of working capital (\$19.37mm). Copernico to define, rank and test targets at its land position in the potential western extension of the belt.
